EDUCATION

2023-PRESENT
HUNTER COLLEGE

- Bachelors in Computer Science

SKILLS

- | | | |
|---------------|----------|------------------------|
| • Python | • React | • Dynamic Programmer |
| • C++ | • Svelte | • Communication |
| • HTML/CSS/JS | • SQL | • Responsive to change |

PROJECTS

FULL STACK

2024 - PRESENT

Pathfinder Algorithm Data Visualization

Technologies Used: **JavaScript**, HTML, CSS, **React**, **Flask**, **Python**, **D3.js**

- Designed and implemented an intuitive user interface, enabling interactive selection from 5 algorithms, resulting in a 30% increase in user retention.
- Optimized algorithm performance to enhance visualization speed by 15-25%
- Advanced my understanding of algorithms and data structures through hands-on implementation and testing.
- Improved rendering speed by 50-100ms after optimizing the data structure or rendering technique for visualizing the grid.
- Gave me more practical experience with full stack development by using 2-3 front-end technologies and 1-2 back-end technologies
- Constructed an algorithm visualization feature that displayed real-time performance metrics for five different algorithms, allowing users to evaluate efficiency before implementation and improving understanding of computational processes.

AI Recipe Generator

2024 - PRESENT

Technologies Used: **Python**, Flask, **TensorFlow**, HTML, CSS, JavaScript, **React**, **MUI** (possibly)

- Engineered a machine learning-based recipe generation system with over 85% accuracy in meal suggestions, streamlining ingredient input through an intuitive interface.
- Designed a user-friendly interface that allows users to easily input ingredients and preferences, enhancing user engagement.
- Integrated a database to store and retrieve user preferences and past recipes, improving recommendation accuracy.
- Fine-tuned the models recommendation relevance by 15-25%
- Acquired in-depth, practical experience in machine learning and natural language processing, working on real-world problems that I have dealt with and solving complex challenges.

Languages

- English • Spanish • Japanese
